

## Ear training lesson idea 1

Thursday, 27 December 2007

A very basic ear training exercise would be playing a note and then having the student find that note on their instrument.

Then after that becomes easy, play two notes, and ask them to repeat those two notes.

Advance to three notes, and keep going until the student reaches a level when they can easily repeat a two bar melody.

This exercise is extremely important in order for a student to develop an independent musical ear, and be able to play tunes they hear, and pick out solos that they like on their own.
